CASE POINTS:

Most investigators believe that the 2008 Campaign staff, who later became the senior White House staff, negotiated a campaign funding scheme with Silicon Valley billionaires. They traded DOE and TARP funding decisions, in their exclusive favor, for crony campaign resources, campaign web marketing, stock "skims" and insider trading edges. Goldman Sachs participated in most of the deals with a commodities and trade-fixing swindle. The amount of taxpayer funds manipulated, appears to exceed $300B.

Links to all of the confirming information can be found below. All witnesses are willing to demonstrate, prove and validate all of the facts, below, in an open public hearing before an appointed Federal Special Prosecutor.

The provable facts are the following:

- Steven Chu's nomination was organized by the law firm of Covington and Burling which is also the law-firm that Eric Holder worked for. Covington and Burling is retained by most of the Wall Street investment banks and corporations. Both Chu and Holder have been accused, by investigators, of running cover-ups and coordinating violations of the law.

- Applicant: Bright Automotive issued a very public letter proclaiming the DOE program to be a Scam.

- The Senate Investigating Committee issued a public investigation report proclaiming the DOE program to be a Scam.

- Over 200 applicants have stated, to investigators, that the DOE program appeared to be a Scam.

- Goldman Sachs whistle-blowers and under-cover investigators have revealed recordings and emails demonstrating that Goldman Sachs was involved with DOE agents and award winners in a coordinated effort to manipulate the program for personal gain.

- Steven Chu and his associates had investments in the lithium battery industry and did not support fuel cells, hydrogen, ultra-capacitors, energy harvesting or other technologies that competed with their lithium-ion investments. Steven Chu and his associates took specific action to damage any industry that competed with the lithium battery industry.

- Tesla Motors has received more free money in the form of credits, waivers and perks, from State Tax offices, than almost any other company in California. Tesla Motors owners and investors have given campaign cash to more State Officials and Senators than almost any other company in California.

- Lachlan Seward of the DOE ordered his staff to destroy or “lose” applicant documents from applicants who were not campaign donors or who competed with favored applicants of campaign donors.
- The TV Show 60 Minutes has covered portions of the crimes in the following episodes: THE CLEANTECH CRASH; and THE LOBBYISTS PLAYBOOK; and CONGRESS: TRADING STOCK ON INSIDE INFORMATION

- Senior White House staff including Rahm Emanuel, Steven Rattner, David Plouffe, Robert Gibbs, David Axelrod, Jay Carney, Bill Daley, Erick Strickland and others, suddenly quite their White House and senior agency head jobs, in a bad economy, with no higher paying options. These departures all happened immediately upon receiving documents from investigators questioning “The Incident” situation.

- While the Section 136 Law required that applicants were to be reviewed on a “first come/first served” basis; DOE staff changed the rules, internally, so that favored applicants were reviewed first. This was a violation of the law.

- Recently acquired “lost” emails show that White House staff ordered “hit-jobs” on reporters such as Attkisson and Woodward who started to expose issues in the incident and members of the public in retribution for reporting the crimes. The IRS TARGETING Investigation and sites such as http://www.paybackpolitics.org have now shown that federal staff have a record of targeting and attacking the public using government resources. Senators, governors and past Presidential candidates are prepared to testify to this fact before a Special Prosecutor. The White House says that its counsel's office was informed of the IRS's targeting of groups in late April, after earlier saying that it knew that an inspector general's report about the issue was coming but that it didn't know its findings. “Operation Rushbo” has now been exposed at a White House coordinated attack task team.

- Tesla, Fisker, Solyndra, Abound, and similar favored applicants, were hand-held through the DOE process by DOE staff and had little review. Competing applicants received no help from DOE and were stone-walled and delayed until they went out of business, even though a majority of them had better positions, metrics, technology, financials, and debt-ratios than Tesla, Fisker, Solyndra, and Abound.

- Any applicant who questioned, or reported, the DOE process was targeted, delayed, down-ranked, denied and, in many cases attacked with character assassination, career sabotage and blacklisting.

- Steven Chu, and his staff, ordered applicant submissions delayed and modified by Argonne Labs and other reviewers, in order to down-grade applicants who were not campaign donors.

- At each federal law enforcement agency, with jurisdiction over this incident, some agents are working on covering up and some agents are working on prosecution. This has led to a state of zero-productivity which a Special Prosecutor is needed to break.

- Tesla Motors, Solyndra, Abound and other “CleanTech” DOE funded companies were used as money-laundering efforts to pass campaign funding through a “skim network”.
- Steven Chu’s staff told applicant’s they had to pay money to apply, then he said he waived the money, then he had his staff wait until after the deadline to give him the money in order to tell those applicants that they then could no longer apply because they had “missed the deadline”. This was one of many tactics Chu and his DOE staff employed to keep anyone who was not a campaign donor out of the program.

- Jonathan Silver was placed into the DOE in order to work with Silicon Valley VC’s.

- The CIA published multiple reports stating that “over a trillion dollars of Lithium for electric cars” and Indium for Solyndra-type solar tubes “could be harvested in Afghanistan”. Silicon Valley campaign investors involved in the incident held major positions in these assets.

- The White House hired an inordinate number of Google staff and executives because Google investors and owners controlled a portion of the policy programs at The White House.

- Gawker Media, Think Progress and Media Matters were used by Robert Gibbs, Jay Carney and David Axelrod as covert character assassination outlets in order to distribute attacks on journalists, public policy staff and members of the public in a manner which could not easily be traced back to the White House Press office. This is an illegal activity.

- Goldman Sachs is now under investigation, by multiple agencies, and has been charged with billions of dollars of commodity market manipulation and was connected to every investor in “The Incident”. Afghan minerals are “commodities”. Sachs took money in stock trading, finders fees, intermediary fees and other “pass-along” routes. DOE staff have pointed to Goldman Sachs as one of the “key architects of the scheme”. Goldman Sachs has now been called before the U.S. Congress as part of escalating investigations into their activities.

- Rahm Emanuel’s senior aide in charge of finance was indicted for corruption and racketeering. Amer Ahmad, Rahm Emanuel’s senior finance aide was arrested for conspiracy, corruption and racketeering. He pleaded guilty in federal court to charges that he steered state business to his financial adviser in exchange for more than $500,000 in kickbacks.

- Tesla Motors has a vast number of lawsuits filed against it for FRAUD, BREACH, HOMICIDE, SECURITIES MANIPULATION and other very serious matters.

- Tesla stated in it’s own words, in it’s federal patent filings, that it’s particular battery configuration and chemistry was “likely to kill you, your family or your neighbors and burn down your home, your office or your neighbors structures.” DOE and NHTSA officials saw these documents, yet chose to ignore them in order to not upset campaign donors.

- The Department of Energy hired IBM Consulting to “evaluate” auto loan applications when IBM Consulting staff had little or no experience in the auto industry. The IBM staff operated from a small office of a Chinese Church in Virginia. IBM abandoned that office when confronted about it. Witnesses have charged that Steven Chu told this IBM group what results to come up with in order to rig the applicant progress in favor of campaign donors. In fact, history has now
shown that only campaign donors received funding and every single non-campaign donor was sabotaged and/or cut-out.

- Panasonic battery company has been charged with bribery, dumping, price fixing and thousands of deaths in other countries. Panasonic makes the batteries for Tesla

- Dianne Feinstein lobbied for Tesla and Solyndra to get the adjacent properties on land related to her family, in Fremont California. She lobbied against any competing parties getting that land. Her family owned the construction company to build the buildings, the leasing company to lease the buildings, the staffing company to hire the employees and owned insider trading stock in the companies that supplied some of the materials to Tesla and Solyndra. Her husband had ownership connections to the adjacent railroad properties.

- The computers of Dianne Feinstein, and her family, were hacked by federal investigative agencies in order to examine her potential involvement with charged illicit activities.

- Senior White House staffer Rahm Emanuel had a personal relationship with Department of Energy “Evaluation Center” Argonne National Labs

- In March 2012, Rod Blagojevich began serving a 14-year sentence in federal prison following conviction for corruption including the soliciting of bribes for political appointments including the 2008 vacant U.S. Senate seat of then-President-Elect Barack Obama, while in public office. The case pointed to White House staff Rahm Emanuel and Valerie Jarrett, who had dealings with Blagojevich. Jarrett’s White House tenure was delayed by FBI investigations.

- The services of Covington and Burling were paid for by Silicon Valley Vc's

- Almost every decision by Steven Chu, while at the Department of Energy, only benefited entities connected to Silicon Valley Vc's

- Silicon Valley Vc's had their companies manipulate internet search engines to up-rank DNC candidates and down-rank GOP candidates per communications with Senior White House staff
- NASA gave The NASA AMES airfield and jet fuel to Silicon Valley Vc's at the direction of White House Staff and California Senators. This appears to be a campaign “thank you” gift.

- Silicon Valley Vc's compensated McKinsey Consulting staff for authoring White Papers for The White House and the U.S. Congress which only discussed the positive aspects of companies which happen to have been owned by Silicon Valley Vc's. Some McKinsey staff have now been indicted and jailed for stock market manipulation.

- Deloitte consulting was both the accountant for DOE applicants and a DOE reviewer for DOE funding

- Whistle-blower Gary D. Conley, who railed against the inequality of federal actions on behalf of Silicon Valley Vc's, was found with a bullet in his head under questionable circumstances

- Panasonic provided documents to the U.S. Government which stated that Tesla Batteries "were not authorized for automotive power use".

- Eric Strickland, The Head of the National Safety Agency, quit his job 48 hours after receiving news from reporters that they knew he had manipulated Tesla's safety data. He had been given numerous reports on the safety dangers of both GM and Tesla vehicles, yet ignored these reports for long periods due to requests to “not upset campaign donors”.

- The applications for DOE funding by applicants who were not campaign backers were manipulated by Steven Chu and his staff. In a public, side-by-side comparison, today, of the applicants documents, almost none of the “winners” would have qualified.

- Steven Chu's nomination docket was almost entirely set-up by Silicon Valley Vc's

- Dianne Feinstein's husband is on the Silicon Valley VC group list.

- An inordinate number of Steven Chu’s DOE awardees needed the minerals which existed in Afghanistan

- Solyndra needed Indium from Afghanistan. Silicon Valley Vc’s had a business interest in mining efforts for Indium in Afghanistan.
- The Silicon Valley Vc's held featured stock in Afghan minerals

- The Silicon Valley Vc's held featured stock in lithium battery profits

- McKinsey Consulting provided both the congressional pitch papers AND the Staff for Steven Chu, which were then used to pitch the “winning” of DOE money by the very people who paid McKinsey.

- A plane crashed with three senior Tesla staff in it. One of them was a whistle-blower. All 3 were killed. One was known to be a whistle-blower.

- Tesla broke federal law by claiming to not be near bankruptcy when it submitted it's Section 136 documents. Elon Musk is now recorded on TV saying Tesla was about to go bankrupt when it was applying for the DOE ATVM loan, this is a violation of the law.

- Tesla claimed, in its application to DOE, that, as of Today, it would have sold over $1 million Tesla’s. It has only sold 20,000 and the cost to sell those 20,000 has been hirer than any car in history, mostly due to mismanagement.

- Steven Chu manipulated federal filing documents to hide Tesla's application falsehoods

- In a public side-by-side comparison, almost none of the companies that received Department of Energy funding would have won over the other applicants

- All of the hundreds of Department of Energy applicants who were tossed out of the DOE funding process had not made campaign contributions

- The few "winners" of the DOE funding just happened to be connected to the largest campaign funders

- Stock market analysts, including researchers from the book: “FLASH BOYS”, featured on 60 Minutes, have documented, all will provide in public hearings, evidence of Tesla Motors pumping it’s stock in order to mask bad news that appears in the press about Tesla

- The "winners" of the DOE money used the DOE money to manipulate public stock market metrics by booking the loans as profits, or credits, in order to “cook their books” and grab windfall profit “scrapes” before the stock fell again. They “skimmed off the top” according to stock market analyst-investigators.

- The lawyers from Perkins Coie held private meetings with Steven Chu's staff in coordination for special interest favors for their clients.

- Over 80 of the promises in Tesla's DOE filings never came true. Former DOE staff attempted to destroy Tesla, and other, application documents but Senate investigators acquired pre-destruction copies from DOE staff who were not willing to be unethical.
- Senior White House staff communicated regularly with Silicon Valley Vc's from before, during and after the election

- Google owners and investors co-own Tesla Motors and manipulate Google search engine results to hide any negative information about Tesla and pump the stock. This is illegal.

– When Tesla Motors applied for the Department of Energy funds Elon Musk stated that Tesla was in exceptional financial health, yet now Elon Musk, and his senior staff, have been recorded stating that the company was nearly bankrupt then. In light of these more recent revelations, is that not a felony violation of the federal “Section 136 Law” which states that ‘a company cannot be on the verge of bankruptcy or it shall not receive Department of Energy funds’? Husband’s Business Ties to China Dog Feinstein – Los Angeles …

LA TIMES INVESTIGATION:

For years, international financier Richard C. Blum’s vast business portfolio has persisted as a nettlesome issue for his wife, Sen. Dianne Feinstein (D-Calif.), a vocal proponent of increased China trade. Three years ago, he vowed to turn over any profits from his China investments to …

Last week California Senator Diane Feinstein abruptly resigned her position as the chairman and ranking member of the Senate Military Construction Appropriations Subcommittee (MILCON). The MILCON subcommittee is in charge of supervising military construction. The committee also oversees “quality of life” issues for veterans, which includes building housing for military families and operating hospitals and clinics for wounded soldiers. During her six years as MILCON leader Senator Feinstein had a conflict of interest due to her husband Richard C. Blum's ownership of two major defense contractors, who were awarded billions of dollars for military construction projects that were approved by Senator Feinstein. That’s Billion with a capitol B. My very own California Senator Diane Feinstein may have just hit one
out of the park folks. By directing Billions of dollars of our tax dollars to her husbands companies, DiFi may have set a new record for corruption. According to a report compiled by MetroActive a San Francisco area newspaper Diane Feinstein used insider information to direct billions of dollars of military construction projects to companies, URS Corporation and Perini Corporation, that were owned or controlled by her husband.

While setting MILCON agendas for many years, Feinstein, 73, supervised her own staff of military construction experts as they carefully examined the details of each proposal. She lobbied Pentagon officials in public hearings to support defense projects that she favored, some of which already were or subsequently became URS or Perini contracts. From 2001 to 2005, URS earned $792 million from military construction and environmental cleanup projects approved by MILCON; Perini earned $759 million from such MILCON projects.

792 million and 759 million works out to 1.551 Billion dollars. And what portion of this billion and a half dollars did DiFi and her husband pocket?

In 2005, Roll Call calculated Feinstein's wealth at $40 million, up $10 million from just a year earlier. Reports show her family earned between $500,000 and $5 million from capital gains on URS and Perini stock. From CB Richard Ellis, her husband earned from $1.3 million to $4 million.

Public records show Blum's company paid $4 a share for controlling interest in Perini, and later sold about three million shares for $23.75 each.

The report also showed URS' military construction work in 2000 was only $24 million, but the next year, when Feinstein took over as MILCON chair, military construction earned URS $185 million. Additionally, its military construction architectural and engineering revenue rose from $108,000 in 2000 to $142 million in 2001, a thousand-fold increase.

In late 2005, Blum sold 5.5 million URS shares, worth $220 million

So a US Senator has used insider information to direct billions of tax payer dollars to her husband's companies and yet I have not seen one word of this in a single antique media outlet. Where is the outrage, where is the indignation, where are CNN, Fox, MSNBC, NBC, ABC, CBS news? And even more importantly where is an investigation by the Senate Rules Committee? Oh wait, Difi is the newly appointed chairman of the Rules Committee so I guess we can rule out an investigation there.

So after pocketing over as much as 300 million dollars as a direct result of her involvement with the MILCON committee DiFi just walks away unscathed?

Where is the investigation and where is Difi's resignation followed shortly by her indictment? Or does that only happen to Republicans?
